

Manufacturer's declaration of Kendrion (Donaueschingen/Engelswies) GmbH

The electromagnetic products included in our product range are components with the meaning of Machinery Directive 2006/42/EC of the European Union (EU). Their operation is prohibited until it has been determined that the machines into which our products are incorporated comply with the provisions of the directive.

Products considered being partly completed machinery within the meaning of Machinery Directive 2006/42/EC are not marked with the "CE" mark.

Products that are subject to Low Voltage Directive 2014/35/EU are marked with the "CE" mark.

Our products are developed, manufactured and tested in accordance with the following standards and directives:

- DIN VDE 0580 (Electromagnetic devices and components - General specifications)
- EN 60529 (Degrees of protection provided by enclosures (IP Code))
- Machinery Directive 2006/42/EC
- Low Voltage Directive 2014/35/EU
- RoHS Directive 2011/65/EU with extension 2015/863/EU
- REACH Regulation No. 1907/2006

Users of our products must ensure compliance with EMC Directive 2014/30/EU together with the user's choice of power supply unit, control system or switching device for operation. If the accessories recommended by us are used, compliance with the EMC Directive can be seen in the respective individual catalogs.

The specifications above do not apply to customer-specific products for which other contractual arrangements have been made.

Note on disposal: Waste electrical and electronic equipment must not be disposed of with household waste. For equipment that can no longer be used, each end user is responsible for disposing of waste equipment separately from household waste, for example at a collection point. This ensures that waste equipment is properly recycled and negative effects on the environment are avoided.
